Lightweight  
and Portable

- » The prism assembly on SECO's #5910-20 360° prism kit slides on 9-mm-diameter solid steel pin poles
- » The assembly is composed of seven 12.7-mm-diameter silver-coated mini prisms in a 360° configuration
- » It features a +2-mm offset and a 40-minute adjustable circular vial
- » A clamp screw locks the prism assembly anywhere on the pole
- » The four 30-cm pole sections feature alternating colors at 5-cm intervals. They connect to achieve heights from 7.5 to 125 cm
- » A spring-loaded ball detent adds tension, keeping the prism from falling when unlocked. It also centers and locks the assembly into the grooves between each color interval
- » A stainless steel point, data collector adapter and carrying case are included
- » Weighs 0.80 kg

## Sliding 360° Prism Kit

The 'sliding' 360° Prism allows for quick shots in confined line-of-sight situations. Easily find the right shot at the right height!

The entire prism kit fits into a 37-cm case, making the #5910-20 very portable.

The included adapter allows for easy connection to controllers, making it great for handheld use. Use one or all four pin pole sections for the height/portability you need.
